Dear EPA Region 10,

I support Willamette Riverkeeper's position that the Portland Harbor Superfund site needs an aggressive clean up that protects people and wildlife for the longterm. In response to your Draft Plan, I feel you need to consider the following:

1. The overall goal of the Superfund cleanup should be to lift the fish consumption advisory for ALL people (including breast feeding women) related to the toxic pollutants found in the Portland Harbor area of the Willamette River.
2. At least 1000 acres of the most highly contaminated sediment should be dredged and removed to achieve this goal.
3. The Draft Plan contains far too much "Monitored Natural Recovery."

Continue the progress made on the more upper Willamette by doing the most/best possible in Portland Harbor!
